2014 award winning paper

Outstanding Paper

Recovery in mental health and substance misuse services: a commentary on recent policy development in the United Kingdom

Marcus Roberts, Andy Bell, (2013)

Successes and Challenges

Successes

- Attracted some high profile authors, increased international authorship
- Can publish papers with a timely turn-around
- A place to publish “secondary outcomes” papers from larger studies and/or discussion pieces “state of the science”
- Some service user authored papers
- All papers are double blind peer reviewed

Challenges

- Copy flow; niche area, specific remit of some aspect of mental health AND co-existing substance misuse must be the focus of the paper
- We attract papers from practitioners, not experienced at writing for publication and some papers undergo several major revisions
- Still UK focused, aim to increase international content and readership
- Lack of impact factor

Membership of ISAJE

- Learn from experienced editors
- Advice on gaining impact factor
- Wider editorial membership
- Wider readership and authorship

Thank you!
